FOR IMMEDIATE RELEASE

Linktropy WAN Emulators Now Available on GSA Schedule

Apposite Appoints Aglow Technologies as its GSA Schedule Holder

LOS ANGELES, CA (January 17, 2008) — Apposite™ Technologies today announced that it has appointed Aglow Technologies as its GSA Schedule holder. Apposite's Linktropy™ WAN emulation products are now available to qualified federal and military buyers through Aglow's GSA schedule number GS-35F-0460T.

Linktropy 4500 and 7500 series WAN emulators simulate bandwidth, latency, jitter, loss, and other network impairments at up to 1 Gbps with fine-grained precision to provide accurate simulations of any type of wide-area network. An intuitive, browser-based user interface makes it easy to test the performance of networking applications under real-world conditions. Linktropy WAN emulators have been widely deployed by enterprise network managers, network application and equipment vendors, telecoms carriers, test labs, and military and government network designers.

Based in Westminster, California, Aglow Technologies specializes in e-business solutions and business-to-business sales of computer hardware, software, and services. Aglow offers knowledgeable technical staff and responsive customer service. Aglow is a small, woman-owned business, and is SBA certified as both an 8(a) firm and as a small, disadvantaged business.

“Military usage of the Linktropy products has expanded rapidly over the past year, and we wanted to simplify the purchasing process for those users,” explained DC Palter, Apposite President. “We selected Aglow Technologies as our partner for their ability to go beyond box sales to offer a high level of support and pre-purchase guidance as a total solution provider.”

“We've been using Linktropy WAN emulators for our own in-house testing and demonstrations and have been very impressed its quality, performance, and ease-of-use,” said Jon Newman, VP of Technology at Aglow Technologies. “We're proud now to be able to offer the Linktropy product line to government customers through our GSA schedule.”

Qualified federal and military buyers can now order Linktropy WAN emulators via GSA schedule GS-35F-0460T by contacting Aglow Technologies at (714) 534-2032 or on-line through GSA Advantage at <http://www.gsadvantage.gov>.

About Apposite Technologies

Apposite Technologies makes WAN emulation easy by offering high-precision network emulation tools at reasonable prices. Apposite's Linktropy WAN emulation appliances simulate bandwidth, latency, loss, and other network impairments at up to 1 Gbps with fine-grained precision to provide accurate simulations of terrestrial, wireless, satellite, internet or any other type of wide-area network. *Apposite Technologies – WAN Emulation Made Easy.*
